Generation
answers with [n], verbatim
no [Wn] / URL; ZH or EN
Orchestration
budgets & caps; early stop
evidence ≥ 6 and new < 25%
Assembly & audit
Assembly: renumber, drop dead markers
Stage A
code hard gate
Stage B
model review
no
critical?
yes
one minimal repair
one pass, count capped
re-validate
back to Stage A
loop back to Stage A
to Supervisor final
Web Agent
Round 1 search
DeepSeek native, 90 s cap
fail-open on timeout
self-judge
sufficient -> stop
otherwise retry once
if insufficient
Round 2 retry
<= 2 rounds hard cap
same cleaner and tierer
tier tagging
T1 official, T2 media
T3 self-media (labels only)
cleaning & metadata
drop duplicates, strip markup
keep snippet + URL + date
Supervisor final
audit passed? · final decision: pass / partial
Section 1 - local
[n] citations · verbatim
no [Wn] / URL
Section 2 - web
URL + tier (T1/T2/T3)
not in the local citation pool
